

Canyon Lumber Co., Inc.

The Premium Choice for Douglas Fir Since 1907

Canyon Lumber Co. has been operating in the same location for over 100 years. We have been kiln drying high grade Douglas Fir products since 1907.

Our reputation for quality and customer satisfaction is unsurpassed in the industry, both nationally and internationally.

Log Selection

The selection of high quality Douglas Fir logs is the first step in the process of manufacturing high grade KD timbers. Logs are selected for size, grain and overall appearance. Generally only 30% of the logs off a timber sale are good enough to make our sort. Our logs are held in inventory approximately 3 to 4 months prior to processing.

Quality

Logs are processed into your orders by an exceptional team of

Our mill only processes high grade Douglas Fir. Canyon

Lumber received the Western Wood Products Association Hi-Q Mill award for excellence in

grading for 2005 and 2006.

operators utilizing modern state of the art computer controlled equipment. Our operators and graders average twenty years experience each.

Product Quality

Our modern conventional dry kilns utilize a state of the art low pressure steam system. Computers measure and control the process from start to finish. Carefully controlling the temperature and humidity is the proven method to insure product stability, high quality and structural integrity during the drying process.

Product Availability

In order to expedite shipments of your orders, we maintain an inventory of several million board feet of KD Douglas Fir products at all times. Our #1&Btr. FOHC inventory includes 3x4 through 14x14 up to 32 feet and can be S4S, resawn or rough. The 4x4 through 4x12 S4S KD #2&Btr. eased edge and the 2x4 through 2x12 rough squared edged KD fascia are in lengths of 8 to 20 feet.

Highest Standards

Technology and decades of proven performance are what it takes to consistently produce products that meet or exceed the highest standards.
