

Hardeply Siding is a premium siding panel designed to provide the subtle and infinitely variable characteristics of natural wood that convey a sense of individuality that is impossible to duplicate with factorymade imitation-wood materials. Panel siding can be used in attractive combinations with other wood and nonwood building products. The beautiful, clear hardwood of this panel creates elegant siding for interior or exterior applications.

Key Advantages

- Natural wood appearance
- Greater dimensional stability
- Face produced from select import veneer
- NAUF (No added urea formaldehyde)
- Manufactured to meet or exceed APA - The Wood Association
